## **DETAILED ACTION**

### ***Drawings***

1. Figures 6-13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, last paragraph the phrase "a folding portion ..... and folded backward in order to form the opening" is vague and indefinite. It is not clear which opening is formed by folding back which folding portion, if there are two openings or only just one. In claim 2, it is not clear if the applicant intends to claim the combination of a corrugated-cardboard packing member, a pair of holding members and a corrugated cardboard box, or just the subcombination of a corrugated-cardboard packing member. For the purposes of examination the examiner will treat the

claim as being directed to only the subcombination of a corrugated-cardboard packing member.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. (5,398,808). Chen discloses a corrugated-cardboard packing member (see Figures 3 and 4 embodiments) comprising: a bottom housing portion for housing an article; a pair of spacer portions (wall panels 22 and reinforcing panels 23) that are provided to project upward from the ends of said bottom housing portion and that can be arranged in a gap between the upper surface of a pair of holding members and an inner surface of a corrugated cardboard box, an opening (first opening 216) formed by cutting off predetermined area of the bottom housing portion and folding back the remaining area downward; an article supporting portion adjacent to said opening; and a second folding portion which is arranged between the opposite sides of the pair of holding members and folded back downward in order to form a second opening (second opening 216).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3728

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen. With respect to claims 3 and 4 and the orientations of the cores of the corrugated cardboard, this would be a design choice as to provide more stability to the package.

#### ***Allowable Subject Matter***

9. Claim 1 is allowed.

10. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are packaging members analogous to applicant's instant invention.
